

Holy Places Inn

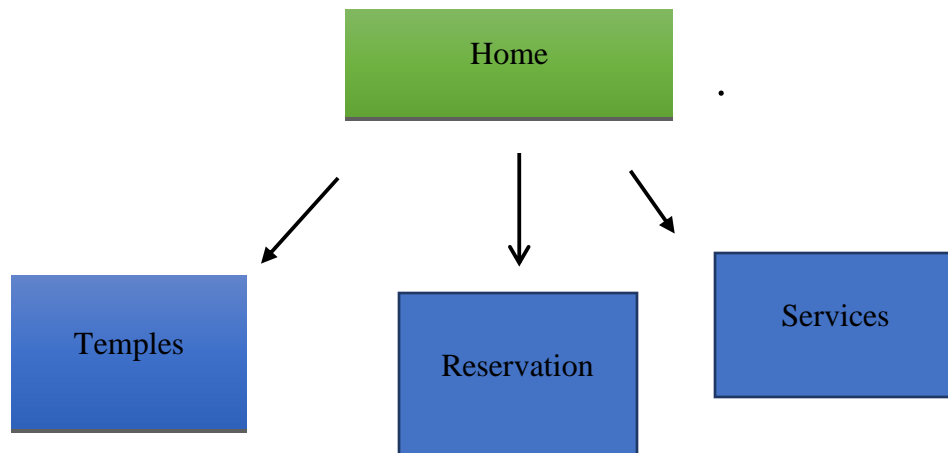

Site Purpose

Holy Places Inn is a website designed to aid those who must travel to work in the temple. We understand how difficult it can be to plan accommodations along with an out-of-town temple visit, so our site will be equipped with things such as a list of specialized services the inn provides, the amenities included with the guest's stay, the names and addresses of certain temples, a form to fill out for reservations, wedding reception accommodations, and information about suites offered for full-time temple missionaries staying at the inn.

Target Audience

This website will target more specifically people who are in their later years (e.g. 50-80 years old). These are the people who usually have the most time to set aside to be full-time temple workers, and they are the most likely to travel to visit/work in the temple.
